

Individual State Reports

Idaho Impact of Declining Revenues on Higher Education From 1991-2016

State Appropriations and Tuition

NOTES: Data adjusted for inflation using the Higher Education Cost Adjustment (HECA). Full-time equivalent (FTE) enrollment equates student credit hours to full-time, academic year students, but excludes medical students. Educational appropriations are a measure of state and local support available for public higher education operating expenses including ARRA funds, and exclude appropriations for independent institutions, financial aid for students attending independent institutions, research, hospitals, and medical education. Net tuition revenue is calculated by taking the gross amount of tuition and fees, less state and institutional financial aid, tuition waivers or discounts, and medical student tuition and fees. Net tuition revenue used for capital debt service is included in the net tuition revenue figures above.

SOURCE: State Higher Education Executive Officers

	1991	2008	2016
Percent of State Appropriations	86.5	80.6	64.7
Percent of Tuition	13.5	19.4	35.3

Idaho is losing ground in its support for higher education. Since 1991, Idaho's percent of state appropriations to support the cost of education has fallen from a high of 86.5 % in 1991 to 64.7% in 2016. Tuition costs have risen from \$1,701 per FTE to over \$4,151, over 144%. During that same period, state appropriations have fallen from 10,912 to \$7,603, over 30% decrease.
