

Individual State Reports

Kansas Impact of Declining Revenues on Higher Education From 1991-2016

State Appropriations and Tuition

NOTES: Data adjusted for inflation using the Higher Education Cost Adjustment (HECA). Full-time equivalent (FTE) enrollment equates student credit hours to full-time, academic year students, but excludes medical students. Educational appropriations are a measure of state and local support available for public higher education operating expenses including ARRA funds, and exclude appropriations for independent institutions, financial aid for students attending independent institutions, research, hospitals, and medical education. Net tuition revenue is calculated by taking the gross amount of tuition and fees, less state and institutional financial aid, tuition waivers or discounts, and medical student tuition and fees. Net tuition revenue used for capital debt service is included in the net tuition revenue figures above.

SOURCE: State Higher Education Executive Officers

	1991	2008	2016
Percent of State Appropriations	74.0	58.6	47.3
Percent of Tuition	26.0	41.4	52.7

Although Kansas' cost for higher education has increased by slightly more than 20% since 1991, the share of that cost has dramatically changed. The state appropriation in 1991 was about 74%, \$7,661. By 2016, that amount had dropped to \$5,745, a decrease of 25%. Student tuition, however, as a share of educational costs, has risen from 26% (\$2,693 in 1991) to over 52% (\$6,405), an increase of 137%.
